

RAILMARK REBRANDS ITS RAIL LOGISTICS BUSINESS UNIT

NEWS RELEASE – (Madisonville, KY) – January 11, 2017

Railmark Holdings, Inc. announced today that it is consolidating its rail logistics business activity under its wholly-owned subsidiary **Railmark Rail Services Inc. (RRS)** and re-branding its rail logistics business unit “**Railmark Logistics**”. Since 2006 Railmark has offered full service, rail-centric logistics services through its **Rail Freight Solutions Inc.** subsidiary. Beginning in 2017 all new rail logistics service contracts will now be performed by **RRS** under the new branding “**Railmark Logistics**”. **RRS** will continue to offer railcar mechanical services for both freight and passenger railcars with its mobile and shop crews, as well as, transit rail services. The Company’s primary network of **Railmark Rail Service Centers** located in California, Illinois, Indiana, Kentucky, Michigan, New Jersey, Texas and in Ontario Canada, remain unchanged. Railmark also maintains “as needed” track access at other points across the United States and locations in Canada and Mexico.

It has long been Railmark’s philosophy to operate its business using “**Railmark Rail Service Centers**” providing its customers with multiple rail services from the same facility and staff. Through its rail service centers Railmark offers multiple rail services including track repair, railcar maintenance, rail management and rail logistics services. This business practice better utilizes Railmark’s teams and resources, resulting in lower overhead and lower costs for our customers. Over the years this concept has allowed Railmark to provide service delivery efficiencies to its customers requiring multiple rail services. Railmark continuously expands its rail service center network. Railmark is now in its nineteenth year of business.

Railmark President & CEO B. Allen Brown commented, “Our rail logistics business continues to grow as customers seek shipping options with greater efficiencies and lower costs. Railmark’s decision to consolidate its rail logistics business unit will now allow the Company to focus greater resources towards the automotive and government sectors. We are looking forward to additional announcements with the Company’s rail logistics business unit.”
