

GATE MECHANISM BOX HEATER

Item# RH1000

- **110 Volt, 30 Watts (+/-5); Also available in 24 Volt (RH1001)**
- **Uses modern carbon fiber heating technology, safer for the environment**
- **Converts 95+% input energy to heat, reducing power requirements**
- **Easily mounted in the bottom of the gate mechanism box**
- **Ensures proper functioning in cold temperatures (32F to -58F)**
- **Silicon encased power cables engineered to perform in extreme weather**
- **Lightweight; No Emissions (CO2, Dust, Magnetic Waves)**
- **No noise; Does not dry air**

Railmark believes that this technology will prevent failures in crossing gates due to freezing weather. Railmark offers this new heating technology to the railroad industry for Signals, Industrial Switch Heating, Locomotive Heating, Passenger Car Systems and Tank Car Heating. Contact us today for more information.
