

Examples of Modern Commuter & Regional Trains Used in Railmark's Rail Development Programs

Commuter and Regional Trains can be selected based on passenger density and motive power needs. Trains may be operated by the State government, regions, municipalities, or by private enterprise. Some examples of Railmark's train design choices are:

- Single-deck electric multiple units
- Double-deck electric multiple units
- Diesel multiple units
- Hybrid multiple units
- Single-deck coaches
- Double-deck coaches

Diesel Multiple Unit (diesel, electric, dual-mode or hybrid)
